Experience

NVIDIA

Seattle, WA USA

POSTDOCTORAL RESEARCHER

Nov 2025 -

- Bio-inspired foveated perception systems for robotics applications

Harvard University

Cambridge, MA USA

POSTDOCTORAL RESEARCHER

Jan 2024 - Oct 2025

- Developed a new computational approach for efficient foveated vision based on the human retina and visual cortex, implemented in both CNN and transformer architectures
- Tested a theory of self-supervised learning based on contrastive learning over foveal and peripheral views of matched content

SPARK Neuro, Inc.

Remote

COMPUTATIONAL NEUROSCIENCE INTERN

May-August 2022

- Developed an internal Python package for clinical deep learning analyses applied to spectral EEG data using a range of architectures, including transformers, graph neural networks, and convolutional neural networks, using unsupervised and supervised learning algorithms.
- Performed extensive experimentation of SOTA and novel methods, and provided detailed reports of key results to internal stakeholders
- Improved company's clinical diagnostic performance by combining deep learning models with other in-house signal processing techniques

Carnegie Mellon University

Pittsburgh, PA, USA

GRADUATE RESEARCHER

2018-2023

- Developed a computational account of the discrepancy between familiar and unfamiliar face perception using convolutional neural networks (published in *Cognition*, DOI:10.1016/j.cognition.2020.104341; code: github.com/viscog-cmu/familiarity_sims)
- Developed a computational account of spatial mapping of subtasks of object recognition in visual cortex using recurrent neural networks with biological constraints (published in *PNAS*, DOI:10.1073/pnas.2112566119; code: github.com/viscog-cmu/ITN)
- Examined individual differences in human visual cortex topography using neuroimaging (fMRI), in-house and public datasets (published in *Imaging Neuroscience*, DOI:10.1162/imag_a_00488; code: github.com/viscog-cmu/blauch_imaging_neuro_2025)
- Co-wrote funded NSF proposal 2123069: Hemispheric and topographic neural organization of high-level visual representations (\$750,000 USD)

University of Massachusetts, Amherst

Amherst, MA, USA

PRE-DOCTORAL RESEARCH ASSOCIATE AND LAB MANAGER

2017-2018

- Examined task effects in cortical responses to face perception using neuroimaging
- Developed code for the lab for fMRI analysis and color-space conversions
- Trained undergraduate students in fMRI and color space analysis

Education

Ph.D. in Neural Computation

Pittsburgh, PA, USA

CARNEGIE MELLON UNIVERSITY

Sep 2018 - Dec 2023

Quantitative Concentration: Computer Vision and Deep Learning

B.S. in Individual Concentration: Cognitive Computational Neuroscience

Amherst, MA, USA

UNIVERSITY OF MASSACHUSETTS, AMHERST

2013-2017

Cum Laude and Multidisciplinary Honors, Commonwealth Honors College. Minor in Physics.

Publications

- **Blauch, N.M.** Aminoff, E., Tarr, M.J. Functionally Localized Representations Contain Distributed Information: Insight from Simulations of Deep Convolutional Neural Networks. Talk at *39th Annual Meeting of the Cognitive Science Society*, 2017. London, U.K.

Invited Talks

- CCN 2025 workshop: "Modeling the Physical Brain: Spatial Organization and Biophysical Constraints", Amsterdam. 2025.
- NeuroAI Lab, Stanford University. 2025.
- Visual Inference Lab, Columbia University. 2025.
- All-hands meeting, Kempner Institute. 2025.
- Computational Cognition Postdoc Seminar, Georgia Tech. 2025.
- Johns Hopkins Cognitive Science Department. 2025.
- Rajan Lab, Harvard University. 2025.
- Groen & Scholte Lab, University of Amsterdam. 2025.

- Trends in NeuroAI Seminar Series, Stability AI and MedARC. 2024. Video available on Youtube
- Ellis Lab, Stanford University. 2024.
- Cognition, Brain, and Behavior Seminar, Harvard University. 2024.
- Corpus Callosum Dysgenesis Research Group, Washington University. 2023.
- Wang Lab, Washington University. 2023.
- Kanwisher Lab, MIT. 2022.
- Vision Sciences Lab, Harvard University 2022.
- Kietzmann Lab, Donders Institute. 2021.
- McClelland Prize award talk. Center for the Neural Basis of Cognition, Carnegie Mellon University. 2021.
- Presidential Fellowship data-blitz, Neuroscience Institute, Carnegie Mellon University. 2019.

Awards and Honors

- Travel Award, Vision Sciences Society Annual Meeting. 2022.
- Best poster, Neuroscience Institute mini-retreat, Carnegie Mellon University. 2022.
- McClelland Prize for Outstanding Graduate Student Paper (Cognition, 2021), Center for the Neural Basis of Cognition. Carnegie Mellon University. 2021.
- Carnegie Mellon Neuroscience Institute Presidential Fellowship. 2019.
- Cum Laude and Multidisciplinary Honors with Great Distinction, Commonwealth Honors College, University of Massachusetts Amherst. 2017.
- Excellence in Presentation, Chapter Meeting, Western Massachusetts Society for Neuroscience (2017)
- Dean's Scholar, University of Massachusetts, Amherst. 2013-2017.
- John and Abigail Adams Scholar, University of Massachusetts, Amherst. 2013-2017.
- Dean's List (6x), University of Massachusetts, Amherst. 2013-2017.

Mentorship

- (2024-2025) Freeman Cheng, intern in Harvard Visual Computing Group, co-mentored with Fangneng Zhan. Topic: dynamic foveated sensing with Gaussian splatting.
- (2023-2024) Taha Binhuraib (remote mentorship). Topic: topographic transformer models of linguistic cortical organization. Now: Ph.D. Student in Neuroscience, Georgia Institute of Technology.
- (2022) Ricky Huang, mathematics undergraduate student at Carnegie Mellon. Topic: divisive normalization in interactive topographic networks. Now: Ph.D student in Industrial Engineering, UC Berkeley.
- (2020-2022) Raina Vin, computational neuroscience undergraduate student at Carnegie Mellon. Topic: network analyses of word recognition using fMRI. Now: Ph.D. Student in Neuroscience, Yale University.
- (2018-2019) Sandrine Jabbour, biochemistry & molecular biology undergraduate student at University of Massachusetts, Amherst. Topic: behavioral studies of color space navigation. Now: Clinical deep brain stimulation specialist at Medtronic.

Service and Leadership

- Ad-hoc reviewer for Current Biology, NeurIPS Shared Visual Representations in Humans and Machines workshop, Cognitive Computational Neuroscience conference, NeuroImage, Trends in Cognitive Sciences, Nature Human Behavior, Journal of Cognitive Neuroscience, Neuropsychologia, Cognition, Cerebral Cortex, Developmental Cognitive Neuroscience, Nature Computational Science, International Conference on Learning Representations.
- Member, Student Organizing Committee, Cognitive Computational Neuroscience Conference. 2024.
- Graduate Representative, Pitt-CMU Brain Imaging and Data Generation and Education (BRIDGE) Center. 2021-2022.
- Graduate Representative, Pittsburgh Vision Community Group. 2020.
- Co-chair, Colloquium Committee, Center for the Neural Basis of Cognition. 2020-2021.
- Undergraduate Representative, Organizing Committee for the Western Massachusetts Society for Neuroscience . 2016-2017.
- Senior Advisor, UMass Neuroscience Club. 2017.
- President, UMass Neuroscience Club. 2015-2016.

Skills

Programming	Proficient: Python, MATLAB. Working knowledge: BASH, LaTeX, R, Java
Cluster computing	Remote development with VScode, SLURM, LFS, AWS Sagemaker, S3, EC2
Neuroscience	Psychophysical experiments, fMRI, DWI, MEG, EEG, computational modeling, studies of visual cortex
Machine Learning	PyTorch, CNNs, RNNs, GNNs, transformers, transfer learning, self-supervised and unsupervised learning, bio-inspiration
Data Science	Git, WandB, Jupyter Notebooks, Pandas, Matplotlib, Plotly, Seaborn, Statsmodels, Scikit-learn
